SUMMARY

BTech Computer Science student with hands-on frontend development experience, building and deploying multiple live production websites. Skilled in React.js, Next.js, and Tailwind CSS, with practical experience turning designs into responsive, cross-browser-compatible interfaces and integrating REST APIs with backend data.

EDUCATION

BTech — Computer Science | Kothiwal Institute of Technology and Professional Studies (KITPS), Moradabad — Expected Graduation: 2027

EXPERIENCE

Frontend Developer Intern — Zentrix Infotech | 10 Sep 2025 – 10 Mar 2026 (6 Months)

- Built and maintained responsive frontend UI for 3 live production websites — jigyasahospital.com, karahomes.in, avs-enterprises.com — ensuring consistent layout and functionality across browsers and devices
- Collaborated with the team to identify and fix UI, responsiveness, and functional issues prior to deployment
- Integrated REST API data with a PostgreSQL (Neon DB) backend to power accurate, dynamic content

PROJECTS

Aifinity — AI-Powered Skill Assessment & Roadmap Platform | <https://aifinity-frontend.onrender.com/>

- Built Aifinity, a React.js platform for skill-gap assessment, mistake mapping, and personalized learning roadmaps, as part of a hackathon team
- Designed and implemented the site-wide UI/UX with Tailwind CSS, including a custom theme, typography scale, and dashboard/report views
- Presented the project at HackSynergy, a 24-hour national-level hackathon organized by E-Cell IPEC, and received a Certificate of Participation

RozGaar | <https://rozgaar-org-in-imiz.onrender.com>

- Group freelance project — worked on the frontend of RozGaar, a React.js platform with Jaano, Sikho, and Pao sections, using react-router-dom for navigation
- Built and organized the site's CSS architecture (base, component, and responsive stylesheets) for a consistent, bug-free UI

VastraAura | <https://aurasaree.netlify.app>

- Built VastraAura, a full-stack saree e-commerce platform, with a React.js/TypeScript frontend and a Node.js/Express/MongoDB backend
- Implemented product browsing, cart, and checkout flows with backend sync, plus an admin dashboard for product management

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion

Database: PostgreSQL (Neon DB), MongoDB

Tools & Technologies: Git, GitHub, REST APIs, Vite, Vercel, Netlify, Render, Responsive Web Design

CERTIFICATIONS

- Frontend Development Internship Completion — Zentrix Infotech | 10/03/2026
- HackSynergy — 24-Hour National Level Hackathon | E-Cell IPEC | Certificate of Participation (Team project: Aifinity)
- The Complete Python Developer | Udemy | 15/08/2026
